

The Astons Community Led Plan finds out what our community wants (and does not want) so we can influence our future and produce a practical action plan to deliver the most worthwhile ideas.

Our aim is to encourage everyone in our community to influence what happens in the Astons. Your CLP Steering Group will ensure that everyone in the Astons has a chance to contribute to a vision of how our community wants to develop and will identify actions to achieve it.

As a result, our plan will provide evidence of community aspirations and priorities to inform the local councils and other agencies working in our area. For example SODC have told us that they take account of evidence based CLPs when proposing local development plans and allocating grants.

Our inclusive consultation gathers your ideas for community projects. Together, we'll prioritise them and seek ways in which our community can deliver them.
